SKILLS

- C# | OOPs | .NET Core | .NET Framework | MVC | xUnit | Data Structures | Design Patterns | REST API
- Microservices | gRPC | Memcached | MySQL | AWS | Azure | React JS | Redux | JavaScript | Jest
- Jenkins | Git | Jira | Confluence | Scrum

WORK EXPERIENCE

1) CarTrade Tech Ltd - Navi Mumbai, India August 2020 - Present
Software Development Engineer 2

- Achieved **92.7% reduction** in **server processing time** by **optimizing RPC calls** and implementing efficient **DTO caching** for BikeWale's web pages.
- Achieved **90.8% improvement** in **system resilience** by **leading a team of 2 interns** to diagnose and resolve **Chaos Testing** failures across CarWale and BikeWale.
- Reduced microservice **database calls from 13K/min to 1K/min** through strategic **cache key optimization** and batched **multi-get caching** implementation.
- Reduced Nearby User Reviews **Job build time by 79%** via optimized LINQ execution, **accelerating CI/CD pipelines** and cutting cloud compute costs.
- Increased **organic monthly traffic by 13.7%** by systematically improving page speed (**Core Web Vitals**), search visibility (**SEO**) and user engagement metrics (**UX**).
- Reduced **query execution time** of critical database queries by an average of **88.3% (600ms to 70ms)** through **composite indexing, query refactoring, and JOIN optimization**.
- Engineered Hindi localization using static JSON files and dynamic API translations for BikeWale, capturing **0.5 million monthly users** and boosting **monetization leads by 5%**
- Implemented robust **XSS protection mechanisms** for APIs, preventing potential client-side script injection attacks.
- Implemented **Strategy Design Pattern** to **refactor filter page logic**, ensuring modular and maintainable handling of each filter type.

ACHIEVEMENTS

- Awarded **Developer of the Month** at CarTrade Tech Ltd. for architecting **WhatsApp** integration via **Amazon Lex** on BikeWale, increasing revenue-generating leads by **27%**
- Honored as **"Rock Star Team" (2024)** for enhancing BikeWale website.

PROJECTS

1) [PlanMyTrip](#)

- Designed and developed a **destination planner** application enabling users to search destinations, create trip plans, rate/review locations, and manage wish lists.

2) [E-Voting](#)

- Developed a secure **voting platform** enabling user registration as voters/candidates, real-time voting, and automated winner determination based on vote counts.

EDUCATION

Bachelor of Technology: Computer Engineering
National Institute of Technology, Surat, India

July 2016 - May 2020

EXTRACURRICULAR ACTIVITIES

- Designed and delivered Dev Dojo **sessions** for **100+ engineers** at CarTrade Tech, covering a range of essential topics such as **REST APIs, Code Review Culture, Clean Code, Async/Await, and Design Principles**.
- Served as **judge** for **Developer of the Month (DOM)** program at CarTrade Tech, evaluating technical implementations and innovation across engineering teams.
- **Upskilled 9 junior engineers and interns** by creating and implementing a **technical training curriculum** (C#, MVC, Database, React), resulting in faster onboarding and project contributions.
